

The Field

By rule, a soccer field shall be between 100 to 120 yards long and 55 to 80 yards wide. The following dimensions are **recommended**:
 High School Fields (9-12): 110 yards long by 65 yards wide
 Junior High Fields (7-8): 100 yards long by 55 yards wide

An engineered natural turf soccer field should have a minimum of one-and-one-half percent (1.5%) slope for fields which are surface drained. For natural turf fields with a sub-surface drain system the slope should be no less than one (1.0%) percent. For synthetic turf fields with a sub-surface drain system the slope should be no less than one half of one (0.5%) percent. Slope is measured from center to side.
